

1) Which of the following sentences is not a statement?

- A) The word 'because' is not a premise indicator.
- C) If an inductive argument has a false premise, then we know it is uncogent.
- ☒ E) None of the above.

- B) A conditional statement may serve as a premise.
- D) Either you called me last night or somebody else did.

2) The study of general and fundamental problems concerning matters such as existence, knowledge, truth, beauty, law, justice, validity, mind, and language is called:

- ☒ A) philosophy
- C) epistemology

- B) metaphysics
- D) Axiology

3) Suppose an argument is both valid and unsound, which of the following is necessarily true concerning the actual truth value of its premises and conclusion:

- A) It has true premises and true conclusion
- C) It has false premises and false conclusion
- E) None of the above.

- ☒ B) It has at least one false premise
- D) It has true premises and false conclusion

4) In logic, why is it necessary to deliberately avoid terminologies that are said to have emotive meaning

- A) They usually hide the value claims made in an argument.
- C) They thwart readers/listeners from examining a questionable premise by evoking their feelings.
- ☒ E) All of the above.

- B) They make arguments look strong than they really are.
- D) They are primarily used in an attempt to win an argument than to reach at some provable truth.

5) "Minor", according to the 2002 Family Code of Ethiopia, is a person of either sex who has not attained the full age of eighteen years.
- "Minor" means underage.

Considering the above two definitions, which of the following is incorrect?

- A) They are précising and synonymous definitions, respectively.
- C) They use genus and difference and synonymous definitional technique, respectively.
- E) None of the above.

- B) They are précising and lexical definitions, respectively.
- ☒ D) Both definitions are meant to avoid the ambiguity of the term "minor".

6) which is the characteristic of uncritical thinkers

- A) Pretend they know more than they do
- C) give preference to views that support their established views

- B) to follow feelings and act impulsively
- D) preoccupied with themselves and ones own opinions, and so unwilling to pay attention to others' view

☒ E) All of the above

- 7) Suppose a chef has invented a new cuisine with its unique recipe. What kind of definition do you think we should use to define this brand new cuisine?
- A) Precising
☒ C) Stipulative
 E) Persuasive
 B) Theoretical
 D) Lexical
- 8) Professor Johnson said that he will give a lecture about heart failure in the biology lecture hall. It must be the case that a number of heart failures have occurred there recently
- ☒ A) Amphiboly
 C) Begging the question
 B) Equivocation
 D) straw man
- 9) All dogs that are lost are hard to find. Things that are hard to find are expensive. Therefore, all dogs that are lost are expensive.
- A) Composition
☒ C) Equivocation
 E) Red Herring
 B) Accident
 D) Straw Man
- 10) It is clear that we have survival of the fittest, because anything which is not the fittest would not survive, and only those who are fittest survive.
- A) False Dichotomy
 C) Division
 E) None of the above
 B) Snobbery
☒ D) Begging the Question
- 11) Regarding distribution of terms which one of the following is not true?
- A) With the universal affirmative proposition the subject term is distributed
☒ C) With the particular proposition the subject term is distributed
 B) With the affirmative propositions the predicate term is undistributed
 D) With the universal negative proposition both terms are distributed
- 12) Of the following one is not a categorical proposition in standard form:
- A) All trees are plants
 C) No trees are plants
 E) Some trees are not plants
☒ B) All trees are not plants
 D) Some trees are plants
- 13) The quality of a particular categorical proposition is determined by:
- ☒ A) the copula
 C) the subject term
 E) None of above.
 B) the quantifier
 D) the predicate term
- 14) Which of the following is valid
- A) An argument with categorical proposition A as a premise and its conversion as a conclusion.
☒ B) An argument with categorical proposition I as a premise and its obversion as a conclusion.
 C) An argument with categorical proposition E as a premise and its contraposition as a conclusion.
 D) An argument with categorical proposition I as a premise and its contraposition as a conclusion.

15) Identify the correct statement

- A) The direct approach of appeal to the people fallacy accomplished only through oral communication.
- B) Terms may have different intensions and the same extension; but terms with different extensions cannot possibly have the same intension.
- C) An informal fallacy is a fallacy that can be covered by some system or rule of deductive or inductive logic.
- D) The main purpose of a persuasive definition is to give precise and clear meaning to the definiendum.

16) If Fana won the lottery last night, then she'll be driving a new car today. Fana is driving a new car today. Therefore, Fana won the lottery last night. One of the following statement is incorrect about this argument:

- A) This argument contains the fallacy of affirming the consequent.
- B) The truth of the premises in this argument does not guarantee to the truth of the conclusion.
- C) The form of this argument is a hypothetical syllogism.
- D) This argument is a deductive valid argument.

17) Identify the conclusion of the following argument "Science provides a more accurate view of human life than does religion. Because scientific discoveries are continually exposing the false claims of religious myths. Further, science provides the only hope for solving the many problems faced by humankind."

- A) Science provides the only hope for solving the many problems faced by humankind.
- B) Science provides a more accurate view of human life than does religion.
- C) Scientific discoveries are continually exposing the false claims of religious myths.
- D) This passage is not an argument, it is a report.

18) Most of the crows observed so far have been black. Therefore, probably the next crow we see will be black. This argument is an example of.

- A) Inductive, strong.
- B) Deductive, invalid.
- C) Deductive, Valid
- D) Inductive weak.

19) The definition "Plant" means things such as trees, grasses, fruits, and vegetables is an example of.

- A) An enumerative definition.
- B) A definition by sub class.
- C) Operational definition
- D) A persuasive definition.

20) A definitional technique that can be used to produce the five kinds of definition is:

- A) Synonymous.
- B) Etymological.
- C) Enumerative.
- D) Genus and difference.

21) Which of the following are both intensional definitions?

- A) Synonymous definition, demonstrative definition.
- B) Etymological, definition by genus and difference.
- C) Enumerative definition, definition by genus and difference.
- D) Demonstrative definition, definition by subclass.

22) From the following both definitional techniques are important for producing précising definition.

- A) Etymological, genus and difference.
- B) Operational, synonymous
- ☒ C) Operational, genus and difference
- D) Enumerative, subclass

23) Einstein and Newton are voted as the best scientist of all time by fellow scientist. As Einstein and Newton believes that there is a Creator, therefore, any argument against the existence of creator is ridiculous. This argument commits the fallacy of:

- A) False Cause
- B) ☒ Unqualified authority
- C) Weak analogy
- D) No fallacy

24) If I smoke, then I will have a shortened life. I will not smoke. Therefore, my life will not be shortened. This argument may be criticized as:

- ☒ A) It commits the fallacy of denying the antecedent.
- B) It commits the fallacy of affirming the consequent.
- C) It commits the fallacy of denying the consequent.
- D) It commits the fallacy of affirming the antecedent.

25) An argument says: "A is true because B is true, and B is true because A is true." May commit the fallacy of:

- ☒ A) Begging the question
- B) Suppressed evidence
- C) False cause
- D) Ignorance

26) The proposition "No persons who live near airports are persons who appreciate the noise of jets" is an:

- A) O-type
- B) U-type
- C) I-type
- ☒ D) E-type

27) Which of the following statement is true about standard- form categorical proposition?

- A) "Subject term" and "predicate term" do mean the same thing in logic that "subject" and "predicate" mean in grammar.
- ☒ B) Components of standard- form categorical propositions are separate or do not overlap.
- C) The form "All S are not P" is a standard form.
- D) The statement "Some S are not P" does imply that "some S are P".

28) Given the categorical proposition, "Some college students are avid devotees of soap operas." If both the quality and the quantity are changed, the resulting proposition is:

- A) All college students are not avid devotees of soap operas.
- B) All college students are avid devotees of soap operas.
- C) Some college students are not avid devotees of soap operas.
- ☒ D) No college students are avid devotees of soap operas.

29) identify the *incorrect* statement

- A) Whenever one suspects that a red herring fallacy is committed, one should be able to state the conclusion that is logically implied by the premise.
- B) Both obversion and contraposition intersects with their rule of replacing the subject and predicate of a given proposition with their term compliments.
- C) The way of reasoning from the particular to the general irrespective of an exception characterizes inductive argument.
- D) In an inductive argument, the conclusion may consist of information that is not stated in the premise.

30) "Desta is taller than Gemechis and Gemechis is taller than Hagos. The obvious conclusion is that Hagos is shorter than Desta". This argument is

- A) Inductive, strong
- B) Deductive, valid
- C) Deductive, invalid
- D) Inductive weak

31) Gabriella said "For the last two semesters, whenever we had exam, I came with my green tight jeans; and I was successful in all my exams. Unfortunately, today I come to exam with a mini-skirt. Thus, Probably I will not be successful in today's exam." Which of the following is not true about Gabriella's argument?

- A) She commits the fallacy of weak induction.
- B) She commits false cause fallacy
- C) She made strong inductive argument
- D) She commits 'post hoc ergo propter hoc' fallacy.
- E) 'C' and 'D' are correct

32) A certain argument from analogy depends on a causal or systematic relationship between certain attributes, and there is good reason to believe that this relationship exists. Thus, the argument commits:

- A) Fallacy of weak analogy
- B) Missing the point fallacy
- C) Fallacy of strong analogy
- D) No fallacy
- E) Begging the question

33) "After leaving the bookstore, Bitania notices that she was undercharged for her book. She decided not to return the money to the store because if she had overcharged, they wouldn't have returned the money". What is the fallacy committed in this argument?

- A) Over simplified cause
- B) Straw man
- C) Ad hominem Tu Quoque/you too
- D) Begging the question
- E) Ad hominem abusive

34) "None but English Majors are eligible." When a given proposition is translated in to a standard form:

- A) All English majors are persons who are eligible.
- B) Some English majors are persons who are not eligible.
- C) All persons who are eligible are English majors.
- D) All persons who are not eligible are persons who are not English majors.
- E) Some English majors are persons who are eligible.

35) "It is false that some serial killers are not deranged psychopaths. Therefore, all serial killers are deranged psychopaths." The inference is:

A) Invalid, existential fallacy.

C) Invalid, illicit contrary.

E) Invalid, illicit sub-alternation.

B) Invalid, illicit contradictory.

☒ D) Valid.

36) "Some white supremacists are individuals involved in crime. Therefore, it is false that some white supremacists are not individuals involved in crime." The inference is:

A) Invalid, illicit subalternation.

C) Valid.

E) Invalid, illicit contraposition.

☒ B) Invalid, illicit subcontrary.

D) Invalid, illicit contrary.

37) "All fair elections are elections untainted with fraud. Therefore, all elections tainted with fraud are unfair elections." The argument is:

☒ A) Valid.

C) Invalid, existential fallacy.

E) Invalid, illicit contraposition.

B) Invalid, illicit conversion.

D) Invalid, illicit obversion.

38) If an argument is cogent, then one of the following is TRUE. Identify,

A) It has a false premise and a probable true conclusion

C) It is weak

B) It has true premises and a probable false conclusion

☒ D) It is inductive argument

39) Some critical thinkers are not philosophers but all critical thinkers are logicians. Therefore, some logicians are not philosopher." This argument is,

A) Deductive, invalid

C) Inductive, strong

☒ B) Deductive, valid

D) Inductive, weak

40) Which one of the following technique of definitions assigns a meaning to a word by indicating the qualities or attributes that the word connotes.

A) Synonymous definition

C) Operational definition

☒ E) All of the above

B) Etymological definition

D) Definition by genus and difference

F) None of the above

41) Identify the wrong statement

A) If the conclusion is a general statement—that is, a statement in which an attribute is predicated distributively to each and every member of a class—the fallacy committed is hasty generalization.

C) the fallacy of division committed when the conclusion of an argument depends on the erroneous transference of an attribute from a whole (or a class) onto its parts

☒ B) If the conclusion is a class statement—that is, a statement in which an attribute is predicated collectively to a class as a whole—the fallacy is division..

D) The fallacy of composition is committed when the conclusion of an argument depends on the erroneous transference of an attribute from the parts of something onto the whole

42) Identify the *incorrect* statement :

A) Aristotelian standpoint is "open" (or receptive) to existence, whereas Boolean standpoint is closed to it.

☒ C) all inferences that are valid from the Aristotelian standpoint are unconditionally valid.

B) all inference forms that depend on valid applications of contrary, sub contrary, and subalternation are conditionally valid

D) the difference between the Boolean standpoint and the Aristotelian standpoint concerns only universal (A and E) propositions

43) select the best translation for " Not everything that glitter is gold"

☒ A) some things that glitters are not golds

C) All things that glitters are golds

E) A & B are correct

B) some things that glitters are golds

D) No glittering things are golds

44) which one is Illicit-subcontrary

A) It is false that all A are B. Therefore, no A are B.

C) Some A are not B. Therefore, no A are B

☒ B) Some A are B. Therefore, it is false that some A are not B.

D) It is false that all A are B. Therefore, it is false that some A are B

45) the passage "If public education fails to improve the quality of instruction in both primary and secondary schools, then it is likely that it will lose additional students to the private sector in the years ahead."

A) Argument - explanation

☒ C) Non argument

B) Argument - expository passage

D) Argument - conditional statement

46) Mosquito bites are not always the harmless little irritations most of us take them to be. For example, some mosquitoes carry West Nile virus, and people who are infected can become very sick or even die.

A) Argument - explanation

C) non-argument- loosely associated statements

☒ B) non-argument - illustration

D) non-argument- expository passage

47) Either classical culture originated in Greece, or it originated in Egypt. Classical culture did not originate in Egypt. Therefore, classical culture originated in Greece.

☒ A) Deductive- valid

C) Deductive - strong

B) Deductive - invalid

D) inductive - cogent

48) select the best translation for "The only person who painted a picture is Morgan"

A) All people identical to Morgan are people who painted a picture

C) No people identical to Morgan are people who painted a picture.

☒ E) A & B are correct

B) All people who painted a picture are people identical to Morgan.

D) All people who painted a picture are people identical to Morgan

F) A & C are correct

49) identify the incorrect statement

- A) If the conclusion of an argument follows merely from the definition of a word used in a premise, the argument is deductive
- B) An argument that draws a conclusion that something is true because someone has said that it is, is a deductive argument
- C) The form of argumentation the arguer uses may allow one to determine whether an argument is inductive or deductive
- D) In an inductive argument, the conclusion is not supposed to contain more information than the premise

50) if the following sequences of terms are arranged in the order of increasing intension, the result is

"Italian sports car, car, vehicle, Maserati, sports car"

- A) car, vehicle, Maserati, sports car, Italian sports car
- B) vehicle, car, sports car, Italian sports car, Maserati
- C) Maserati, Italian sports car, sport car, car, vehicle
- D) Maserati, vehicle, car, sports car, Italian sports car.
