Simply speaking, earthquake is the shaking of the earth's surface. It is certainly a terrible natural disaster that causes huge damage to life and property. In fact, there are different earth quake. The one is volcanic earthquake which is related to volcanic activity. Again, this is of two types. The first type is Volcano-tectonic earthquake that 16 (A. occurred B. is occurred C. has occurred D. occurs) due to injection or withdrawal of Magma. In contrast, the second type is Long-period earthquake which 17 (A. is caused B. is causing C. has caused D. causes) by the pressure changes among the Earth's layers.

One day in my life, it was just 10 to 12 minutes when incidentally the ground made slight movements in our village. The earth 18 (A. shakes B. shook C. was shaken D. is shaken) harder than I felt before, and I did not believe that I 19 (A. faced B. face C. will face D. have faced) such kind of incident even throughout my life in the future. Thus, a lot of properties 20 (A. buried B. were buried C. was buried D. is buried) under a ton of debris, and some people 21 (A. are injured B. was injured C. injured D. were injured). Nowadays, earthquake has become a buzzword in Bangladesh. In fact, there lies in the active earthquake zone. If major earthquake occurs in there, most of the buildings in most city areas 22 (A. will be destroyed B. were destroyed C. have been destroyed D. destroyed) as they are not built in accordance with an earthquake-resistant code. Moreover, a group of experts says that the repetition of quakes in recent years should 23 (A. takes B. be taking C. be taken D. take) as a signal for a major earthquake in Bangladesh. Another group believes that the matter shouldn't be amplified though there are a variety of fault lines within the geographic area of Bangladesh.
