

PART - I True/False items

Write "TRUE" if the statement is correct and "FALSE" if the statement is incorrect.

Put your answers on the answer sheet.

1. Taking away a child's toy after s/he misbehaved is an example of negative punishment.
2. Non-declarative memory stores abilities such as performing dance in the form of skills.
3. According to Carl Rogers, unconditional positive regard is necessary for people to be fully functioning.
4. The context in which "abnormal" behavior occurs must be considered before deciding that it is a symptom of psychological disorders.
5. Student X performs his activities in fear of the punishments imposed upon him; this is referred to as an implicit motivation.

PART II - Matching Items

Match Freud's defense mechanisms listed under column "B" with their examples under column "A".

- | A | B |
|--|--------------------|
| 1. When you get mad at your spouse, you break your drinking glass by throwing it against the wall. | A. Repression |
| 2. A person with strong feelings of aggression becomes a soldier. | B. Denial |
| 3. An adult cries like a child after getting annoyed with his boss. | C. Regression |
| 4. A smoker refuses to admit to him/herself that smoking is bad for his or her health. | D. Sublimation |
| 5. You blame your colleague as a corrupter when you feel irritated because of your corrupt behavior. | E. Displacement |
| | F. Projection |
| | G. Rationalization |

PART III: Multiple Choice items

Instruction: Choose the best answer from the given alternatives for the following question and write the letter of your choice on the separate answer sheet attached.

1. The ability to focus on one important voice among the many in a noisy restaurant is referred to as:
A. Absolute threshold
B. Difference threshold
C. Signal detection
D. Sensory deprivation

2. Which conflict happens when a particular event or activity has both attractive and unattractive features?
 - A. Avoidance- approach
 - B. Avoidance - avoidance
 - C. Approach - approach
 - D. Multiple approach-avoidance
3. Learning is not always manifested through behavior immediately. It can be hidden and not evident in behavior until when conditions for its appearance are available. This proposition of learning is advocated by _____.?
 - A. Cognitive theory of learning
 - B. Classical conditioning of learning
 - C. Instrumental conditioning of learning
 - D. Social cognitive theory of learning
4. Which approaches to motivation suggest that motivation stems from the desire to attain external rewards?
 - A. Cognitive approach
 - B. Incentive approach
 - C. Arousal approach
 - D. Humanistic approach
5. Which one of the following statements is true about the trait approach to personality assumption?
 - A. Personality traits are relatively stable and therefore predictable over time.
 - B. Personality traits are unstable, and therefore not predictable.
 - C. Personality traits are unstable across a situation.
 - D. People are alike in how much of a particular personality trait they possess.
6. Mr. Kemal, owner of a Company has ten daily workers who are employed to harvest cotton on his cotton farm. He promised each worker to pay 1000 birr if they collect 20 sacks of cotton per day individually. This schedule of reinforcement is:
 - A. Variable ratio schedule
 - B. Fixed ratio schedule
 - C. Fixed interval schedule
 - D. Variable interval schedule
7. What is the major difference between negative reinforcement and punishment?
 - A. Punishments decrease the frequency of behavior and negative reinforcements increase the frequency of a behavior.
 - B. Punishments are used with nonhuman animals, and negative reinforcements are used with humans.
 - C. Negative reinforcements are more effective than punishments but take longer to use.
 - D. Negative reinforcements are used in classical conditioning, and punishments are used in operant conditioning.
8. A married man who has a strong desire to have an extra love relationship around his workplace but feels guilty about it constantly accuses his wife of being unfaithful to him even though he has no evidence. This can be _____ type of defense mechanism.
 - A. Displacement
 - B. Reaction formation
 - C. Denial
 - D. Projection

9. The term 'abnormal psychology' refers to one of the following?
 - A. The psychological study of fundamentally odd people
 - B. Psychological research carried out using highly unconventional methods
 - C. Psychology relates to atypical patterns of thoughts, feelings, and behaviors
 - D. The obscure areas of psychology that relate to topics such as what sheep think about
10. Among the following which one is a lesser form of mood disorder?
 - A. Cyclothymia
 - B. Major Depression
 - C. Dysthymia
 - D. Anxiety disorder
11. During a hearing test, many sounds were presented at such a low level of intensity that Mr. Kebede could hardly detect them. These sounds were below Mr. Kebede's:
 - A. Perceptual set
 - B. Sensory threshold
 - C. Absolute threshold
 - D. Difference threshold
12. One of the following approaches to motivation suggests that motivation is a result of people's thoughts, beliefs, expectations, and goals.
 - A. Incentive approach
 - B. Drive reduction approach
 - C. Cognitive approach
 - D. Arousal approach
13. Which theory of emotion holds that you feel a true emotion only when you become physically aroused and can identify some reason for the arousal?
 - A. Schachter-Singer's theory of emotion
 - B. Cannon-Bard's theory of emotion
 - C. James-Lange's theory of emotion
 - D. Lazarus's theory of emotion
14. Suppose that you call the information operator to find a friend's phone number. When you dial your friend's number, you get a busy signal. Later, when you start to dial the number again, you realize you have forgotten it. This experience probably occurred because the phone number was only temporarily stored in your _____.
 - A. Short-term memory
 - B. Sensory register
 - C. Long-term memory
 - D. None of the above
15. Which one of the following is **not** true about operant conditioning?
 - A) The organism's response operates on the environment to produce a desirable result
 - B) The association of behavior and a consequence of that behavior
 - C) Operant conditioning applies to voluntary responses
 - D) Operant conditioning focuses on the learning of involuntary physiological responses
16. Which one of the following is **not** true about the effectiveness of punishment?
 - A. When punishment follows immediately after the behavior to be punished
 - B. Punishment should be inconsistent with the behavior being punished
 - C. Severe punishments are more effective than a mild one

- D. Less intense punishments may be effective if they are applied immediately and consistently
17. Which one of the following is necessary for the sensation process?
- The sense organs must be active to detect the events
 - Transduction is not necessarily needed to register sensory events
 - The energy that is emitted should be slight to the extent it is undetected
 - Perception must work accordingly
18. For example, if student Tolosaa scored good grades to join university but was assigned to a university located in a remote geographical setting. This motivational conflict is best described by
- Approach-Approach
 - Approach-Avoidance
 - Avoidance-Avoidance
 - Multiple approach-avoidance
19. Which one of the following alternatives is **NOT** the characteristic of personality?
- It is unique and specific to the person
 - It is a temporary and flexible feature of the person
 - The product of heredity and the environment
 - Can be measured qualitatively and quantitatively
20. According to Abraham Maslow, people with a self-actualized personality show the following characteristics except:
- An accurate perception of reality
 - Dependence and poor sense of humor
 - Acceptance of themselves and others
 - Treat people unconditionally
21. Which one of the following is true about post-traumatic stress disorder
- It usually accompanied by obsessive thoughts
 - It is the result of exposure to life-threatening shocking events
 - It is a psychological illness categorized under mood disorder
 - It results from an accumulation of stress that we experience daily.
22. Which one of the following is **true** about the nature of attention in the perceptual process
- We tend to give attention to common stimuli than novel ones
 - We can direct our attention to a large number of stimuli at a time
 - Steady objects tend to attract our attention more than moving ones
 - People tend to give attention to repeated information
23. All are true about declarative memory **except**;
- It is the memory of knowing how to do things
 - It is synonyms with explicit memory
 - It is the memory of facts, events concepts, and general knowledge
 - It is a type of memory that requires a conscious effort to recollection of information

24. Which one of the following is **false** about Short-term memory (STM)?
- STM holds the contents of our attention.
 - Information in STM is readily available for use.
 - STM are brief replicas of the environmental message.
 - STM have capacity limitations.
25. Regarding the human memory system, there is a tendency to recall the first and the last list of items than the middle in a series. Therefore, which one of the following **TRUE** about serial position effect?
- Primacy effect occurs in the last items on the list.
 - Recency effect occurs in the first items on the list.
 - Primacy effect occurs in the middle items on the list.
 - Recency effect occurs in the last items on the list.
26. Shaping is _____?
- A pattern of responses must be made before classical conditioning is completed.
 - Rewarding behaviors that get closer and closer to the desired goal behavior.
 - Completing a set of behaviors in succession before a reward is given.
 - Giving you chocolate pudding to increase the likelihood you will eat more carrots.
27. An emotional component in which such as facial expressions, body movements, and actions that indicate to others how a person feels. This component of emotion is
- The Physiology of emotion
 - The Behavior of emotion
 - Subjective experience of emotion
 - None of the above
28. Which of the following are examples of a fixed interval schedule?
- A student may be given a bonus mark for every ten mathematical problems solved.
 - Giving a reward to the students after answering every five questions correctly.
 - Giving bonus marks for every correct response of students.
 - The daily wages and the weekly rest from work.
29. An interviewer asked the graduating class student of AASTU about the interesting moment that Hirut spent at the university. She said that she loved the culture day event that she enjoyed with her classmates, which was wonderful". Her memory seems:
- Semantic memory
 - Implicit memory
 - Episodic memory
 - Procedural memory
30. The school of thought in psychology that focuses on what the mind does is:
- Functionalism
 - Psychoanalysis
 - Structuralism
 - Behaviorism
31. An anxiety disorder is:
- Involve excessive fear
 - An emotional state identified by panic attacks
 - Hinder ability to function normally
 - All
