

Part I. True/ False item

Write 'True' if the statement is correct and 'False' if the statement is incorrect (1 pt. each)

1. According to skeptics, any search for Truth is futile because Truth cannot be attained. True
2. Semantic Holism is the view that meaning is associated with a single word or sentence. True
3. The main reason many people avoid philosophy is that it questions our deeply held beliefs. True
4. Socrates maintains that philosophy consists of unending search for the truth. True
5. An argument that proceeds from the knowledge of a cause to the knowledge of an effect is an inductive argument. True
6. The content of some conditional statements may be re-expressed to form arguments. True
7. An argument that presents two mutually exclusive alternatives and eliminates one, leaving the other as the conclusion, is an inductive argument. True
8. The intensional meaning of a term consists of the attributes connoted by the term. True

Part II. Multiple-Choice Items

Choose the Correct Answer for the Following Questions (1 pt. each)

1. Logic and critical thinking does not aim to:
- Nurture the skills required to construct good arguments.
 - Take any action based on reasoning.
 - Recommend doing what the majority are doing.
 - All of the above
 - None of the above
2. One of the following is not the concern of metaphysics. Which one?
- The sources of human knowledge.
 - Origin, nature, and development of the universe.
 - The conceptions of God.
 - The study of human beings.
 - Nature and meaning of existence.
3. Of the following, one branch of Epistemology claims that True Knowledge can only be achieved through experience:
- Ontology
 - Empiricism
 - Revelation
 - Rationalism

4. Axiology is a branch of philosophy that deals with questions such as:
- How a certain society acquires knowledge
 - What a certain society regards as good.
 - What the ultimate cause of the universe is
 - None

5. Among the following, one school argues there is no higher authority than a particular society for what is considered to be morally right/wrong.
- Utilitarian Ethics
 - Analytic Ethics
 - Descriptive Ethics
 - None

I +

- Total Marks – 40%

Part-I: Write True or False (1 mark each)

- Part-II: Multiple Choice (1.5 marks each)**

- Which one of the following is true about the definiendum and the definiens part of a definition?

9. If an inductive argument has all **false** premises and probably true conclusion, then we can know that

- Page 1 of 5

- C. The argument is strong.
- D. The argument is cogent.

10. If one of the premises of the deductive argument is false, then the argument is _____
- A. Necessarily unsound
 - B. Can be sound
 - C. Can be Cogent
 - D. Necessarily invalid

11. "If North Korea is developing nuclear weapon, then North Korea is a threat to world peace."

Which one of the following is **false** about the above statement?

- A. It's invalid hypothetical syllogism.
- B. It is non-argument, but it can be re-expressed to form an argument.
- C. It's non-inferential passage.
- D. It can serve as a premise of an argument.

12. Which one is **wrong** about the following sentence?

"We have many patient workers in our company."

- A. The word "patient" is ambiguous.
- B. A lexical definition of "patient" with the lexical rule of "indicating context" can resolve its problem.
- C. The word "patient" is vague.
- D. The sentence may cause verbal dispute.

13. Which one of the following is incorrect?

- A. Invalid deductive argument may have true premise and true conclusion.
- B. Invalid deductive argument may have true premise and false conclusion.
- C. Valid deductive argument may have true premise and false conclusion.
- D. Valid deductive argument may have false premise and true conclusion.

14. Deductive argument can be defined as "*with a given evidences, the conclusion is necessarily follows from the evidences.*" From which this "**necessity**" of the conclusion is derived?

- A. The conclusion equally shares all the features/attributes of the premises.
- B. Because all the information of the conclusion is contained in the premises, and there is no new information contained in the conclusion.
- C. Because the specific conclusion is derived from the general premises.
- D. All are correct.

15. Which one of the following is **not** correct?

- A. Philosophy is a holistic approach to problems related to life, being, knowledge, and values.
- B. As a critical rational enterprise, philosophy often examines the hidden dehumanizing elements in culture, religion, politics and socio-economic patterns.
- C. Philosophy is a discipline that basically deals with ideas that affect only human life.

23. Dr. Abebe is a heart surgeon in Ayder Hospital. He says that many heart failures are caused by anxiety. In view of the expertise (Dr. Abebe) anxiety is the major cause of heart failure.

This argument is evaluated as _____

- A. Inductive based on authority
- B. Deductive based on hypothetical syllogism
- C. Deductive based on categorical syllogism
- D. Inductive based on inductive generalization

24. Which one of the following is not correct?

- A. As a critical rational enterprise, philosophy often examines the hidden dehumanizing elements in culture, religion, politics and socio-economic patterns.
- B. Philosophy is a discipline that basically deals with ideas that affect only human life.
- C. Political philosophy is a critical examination in the workings of basic institutions that administer justice, determine public-government relations and the relations between the laws and humanity.
- D. Philosophy is a holistic approach to problems related to life, being, knowledge, and values.

25. If the Big Bang theory is correct, then the universe is billions of years old, and if the Big Bang theory is correct, then the universe was not created in six days. Thus, if the universe is billions of years old, then it was not created in six days.

- A. Deductive, Categorical, Valid
- B. Deductive, Hypothetical, Invalid
- C. Deductive, Disjunctive, Valid
- D. Deductive, Hypothetical, Valid

Part III: Short Answer (1 mark for each blank space)

26. Write the second premise to make the following argument a valid deductive argument.

P₁: All athletes are celebrities.

P₂: _____

C: Therefore, Haile Gebre Selassie is a celebrity.

27. "Italian sports car, vehicle, car, sports car"

Put the above terms in the order of _____

- A. Increasing Intension
- B. Increasing Extension

28. In her work *Philosophy Who Needs It?* Ayan Rand wrote the following story to explain the importance of philosophy for every day human life. "Suppose that you are an astronaut whose spaceship gets out of control and crashes on an unknown planet. When you regain your consciousness and find that you are not hurt badly, the first three questions in your mind would be: A) Where am I? B) How can I know it? C) What should (ought) I do?"

Write the branches of philosophy that can address these questions?

- A. _____
- B. _____
- C. _____
