

15. If Helen is trying to remember the list of terms by simply repeating them now and then to herself, she is using _____.
 A. Elaborative rehearsal
 B. Maintenance rehearsal
 C. Procedural memory
 D. Encoding memory
26. Mikias sees a strikingly beautiful woman across a cafeteria and feels the overwhelming urge to run over and ask her phone number. However, he knows that this behavior would cause problems, perhaps embarrassment or even physical injury if a bouncer or angry boyfriend got involved. Therefore, he decides against it. According to Freud, which part of Mikias's psyche stopped him what he intends?
 A. id
 B. Unconscious
 C. ego
 D. superego
25. Abebe learned French when he was 20 and Arabic later. Now, when he is trying to remember French words, he ended up by recalling the Arabic words. Abebe's situation is _____.
 A. Reproductive Interference
 B. Proactive interferences
 C. Retroactive interferences
 D. Retrograde amnesia
26. Hawa, who is a 40 years old woman, tells her son how she escaped from a car accident that she had 8 years ago. Which type of memory is used by Hawa?
 A. Semantic
 B. Implicit
 C. Procedural
 D. Episodic
27. John loves to fish. He puts his line in the water and leaves it there until he feels a tug. What type of reinforcement schedule is he rewarded?
 A. Variable interval
 B. Fixed ratio
 C. Fixed interval
 D. Variable ratio
28. If one's thoughts were able to alter that laws of physics (mind over matter) this would be an example of:
 A. Psychokinesis
 B. Clairvoyance
 C. Telepathy
 D. Precognition
29. Ms. Y is a happy single pregnant woman but she is afraid of opposing moral standards of the society if she gives birth without marriage. This is best referred as _____ conflict of motives.
 A. Avoidance- Avoidance
 B. Approach - Avoidance
 C. Approach-Approach
 D. Multiple Approach-Avoidance
30. Mr. X is a hospitable man, usually trusts his friends and is easy going. He will probably fall in the dimension of _____.
 A. Openness
 B. Agreeableness
 C. Conscientiousness
 D. Extraversion
31. Ms. Y does not feel comfort whenever somebody is trying to approach her closely? This is probably _____ personality disorder.
 A. Schizoid
 B. Paranoid
 C. Narcissistic
 D. Schizotypal

32. Mr. X had a girlfriend; he cannot stop thinking about her even though she is currently married, and is trying to disturb her life in a harmful manner. He is probably suffering with _____ disorder.
- A. Post-traumatic stress B. Generalized anxiety C. Panic D. Obsessive compulsive
33. Suppose a woman thinks that she is the center of attention, show artistic speech and clothing. This behavior can be labeled as _____.
- A. Paranoid personality Disorder C. Histrionic Personality
B. Narcissistic Personality D. Avoidant Personality
34. The tendency to perceive a motion of a single stationary light or object is termed as _____.
- A. Induced movement C. Stroboscopic motion
B. Auto kinetic motion D. None

PART - IV: SHORT ANSWER ITEMS.

1. Give a practical example of your own experience on **Classical Conditioning**. After your clear and concise description of the behavior, please identify the following elements. (1 point each)
 - A. The neutral stimulus
 - B. The unconditioned stimulus
 - C. The unconditioned response
 - D. The conditioned stimulus
 - E. The conditioned response
2. Give a practical example of a behavior learned through **operant conditioning**. First, write the behavior you believe learned through operant conditioning. Then, identify the following elements from the behavior. (0.5 each).
 - A. A possible positive reinforcement,
 - B. A possible negative reinforcement,
 - C. A possible positive punishment,
 - D. A possible negative punishment,
 - E. The possible fixed ratio reinforcement,
 - F. The possible variable ratio reinforcement,
 - G. The possible fixed interval reinforcement,
 - H. The possible variable interval reinforcement

PART - III. CHOOSE THE BEST ANSWER FROM THE GIVEN ALTERNATIVES. (1 pt. Each)

18. A freshman student at AASTU, faced a difficulty of choosing either getting his long hair cut or dismissal from the university. This can be best expressed by _____ conflict of motive.
- A. Avoidance-avoidance
 - B. Approach- approach
 - C. Approach avoidance
 - D. Multiple approach avoidance
19. A football player was substituted at the 50th minute in the football game. Then, he throws the water container in response to his substitution. The defense mechanism he used was _____.
- A. Displacement
 - B. Projection
 - C. Reaction formation
 - D. Rationalization
20. Abel is recovering from a serious motorbike accident, and therefore he was afraid to ride a motorbike but not a bicycle. Abel's pattern of fear is best illustrated by _____.
- A. Stimulus generalization
 - B. Spontaneous recovery
 - C. Stimulus discrimination
 - D. Extinction
21. A girl was usually visiting the kitchen while her mother was preparing food for the family. One day since her mother went somewhere, the girl managed to prepare food. Her learning was best explained by _____.
- A. Operant conditioning
 - B. Latent learning
 - C. Insight learning
 - D. Classical conditioning
22. A person saw a car accident; his heart races faster and his brain labels it as fear concurrently and then he feels fear. This situation is best explained by _____ theory. *→ Cognitive appraisal*
- A. Jams-lange
 - B. Cannon-bard
 - C. Schachter-singer
 - D. Charles Darwin
23. Negative reinforcement differ from negative punishment in a manner that the **former**:
- A. Strengthen response as a pleasant stimulus is terminated.
 - B. Increase response by presenting aversive stimulus.
 - C. Increase response by terminating unpleasant stimulus.
 - D. Suppress response by presenting aversive stimulus.
24. Suppose you want to call to your friend by public phone, you are expected to insert extra coins after every 20 seconds in order to have further call. Then which schedule of reinforcement is employed here?
- A. Fixed ratio
 - B. Variable ratio
 - C. Fixed interval
 - D. Variable interval

GENERAL PSYCHOLOGY FINAL EXAM

Full name Tesfamiel Tafere ID. No. ETS 1303/15 Section: 27

PART - I: WRITE 'TRUE' IF THE STATEMENT IS CORRECT AND 'FALSE' IF THE STATEMENT IS INCORRECT. (0.5 Each)

1. It is possible to be motivated via intrinsic and extrinsic motivation concurrently.
2. Chunking is the process of summing smaller information in to its larger parts.
3. People who experience intimidating natural and/or man-made accidents will develop a generalized anxiety disorder.
4. The purpose of positive punishment is to increase a behavior and the negative one is to decrease the undesired.
5. Sensory memory has very detailed and large information that stays for a long period of time.
6. The tendencies to memorize items listed at the middle are termed as recency effect.
7. It is good to be judgmental during the interaction that the counselor has with the client.
8. The "tip-of-the-tongue" phenomenon appears to be caused by a problem in retrieval.
9. Based on Maslow's hierarchy of needs, a person can progress in to higher needs without meeting the lower one.

PART - II: Match the descriptions under Column "A" with its appropriate defense mechanism listed under Column "B". (1 Point Each)

- | <u>A</u> | <u>B</u> |
|--|------------------------|
| 10. The tendency to revert back to our immature behaviors. | A. Displacement |
| 11. Finding a socially acceptable explanation for what you failed to get. | B. Repression |
| 12. A person with a feeling of aggression becomes a soldier. | C. Regression |
| 13. Keeping ones threatening situations & feelings in to the unconscious. | D. Denial |
| 14. A student who did not recognize his failure and considered it as a mistake. | E. Sublimation |
| 15. A person with a feeling of sexual desire becomes an active opponent of sex provoking movies. | F. Reaction formation |
| 16. A man sexually attracted to a neighbor perceives that the neighbor is attracted to him. | G. Rationalization |
| 17. A student who is upset with his parents beat his younger brother. | H. Projection |
| | I. Compensation |
| | J. Intellectualization |
