

Section 1: Multiple choice. Choose the right answer (1 points each)

- Miss 'y' moved to a big town for her new role at a well-known engineering company which pays a lot. She is so proud working in such well known company but couldn't share this feeling to anyone as she is living in a new city. In Maslow's hierarchy what type of need she is desiring?
 - Esteem needs
 - Safety needs
 - Self-actualization needs
 - ☒ Love and belongings needs
- _____ is a structure of personality governed by a reality principle to balance demands of society and personal satisfaction in way that has no negative consequences.
 - Superego
 - ☒ Ego
 - Id
 - Libido
- A fixation at this stage creates a habits like nail biting, smoking and chewing at Adulthood age?
 - Phallic stage
 - The Anal stage
 - ☒ The oral stage
 - Latency stage
- A student who is rejected from her dream college may explain that she's happy to be attending a school that's less competitive and more welcoming. What kind of defense mechanism is this?
 - Regression
 - Repression
 - ☒ Reaction formation
 - Denial
- One of the following is not a type of anxiety disorder?
 - Social phobia
 - Obsessive-compulsive disorder
 - ☒ Bipolar-disorder
 - Post-traumatic stress disorder
- This personality disorder is characterized by unstable relationships and acts of emotional dependence and independence at the same time which cycles between two extremes.
 - ☒ Borderline personality
 - Paranoid
 - Histrionic
 - Avoidant

Section 2: Describe the right answer in short (4 marks)

- Drive reduction Is called the body's version of thermostat to maintain a steady state. 1 points
 - Coca cola company annually-award-double salary for best performing employees in the year. This type of motivation for employees is called Extrinsic 1 points
 - Mention and describe Maslow's five Hierarchies of needs in short? 2points
- Answer here.....

7. Which of the following best describes the phenomenon known as sensory adaptation?
- I couldn't pass by the smelling drainage at my apartment but the janitor barely smells it.
 - I couldn't sleep because of the ticking clock in my room
 - The band music from the neighboring studio keep annoying me every night.
 - I couldn't familiarize myself with the size of my recent eyeglass.
 - None
8. Because you associated your waitress at a restaurant with food, you may start to salivate when you see her carrying your food over to you. According to classical condition, your waitress is _____
- Unconditioned stimulus
 - Conditioned stimulus
 - Unconditioned response
 - Conditioned response
9. Which one is NOT true
- Chunking refers to grouping of larger units of information into meaningful small pieces.
 - Stimuli → sensory Memory → attention → short term memory → encoding → long term memory
 - C. Associating new information with different things and person that we already know is call maintainance rehearsal.
 - D. Encoding → storage → retrieval
10. When you are standing in an entrance and see your friend walking towards you, the image of him will grow larger on your retina, but you do not perceive him as actually growing in size. This is because of _____
- color constancy
 - size constancy
 - shape constancy
 - linear constancy

Section 2 : Describe the right answer in short (5 marks)

- What is the goal of psychology? Mention and describe all(2pt)
- Define sensation and perception? (1pt)
- What is primacy and recency effect in recalling memory (1pt)
- _____ is a relatively permanent change in behavior occurring as a result of experience or practice. (0.5 pt)
- When Fasil smells perfume, he is always instantly reminded of his first date. This is called stimulus _____(0.5pt)

all. What process makes this possible?

- A. Sensory deafness B. Sensory adaptation C. Sensory overload D. Motor fixing

17. The process by which our brains organize and interpret sensory information, sorting it into useful information is?

- A. Sensation B. Absolute threshold C. Perception D. Difference threshold

18. A punisher can be

- A. the onset of an unpleasant event C. any consequence that reduces the occurrence of a behavior
B. the removal of a positive state of affairs D. a positive reinforcer

19. Husband and wife remarrying after a period of separation best exemplifies

- A. Stimulus generalization B. Stimulus discrimination C. Extinction D. Spontaneous recovery

20. Type of reinforcement in which a person is reinforced by observing his model while getting reinforcement is

- A. Vicarious reinforcement B. Self-reinforcement C. Direct reinforcement D. None

21. In the definition of psychology, behavior means:

- A. Internal, covert processes B. Mental processes C. Outward or overt actions and reactions D. All

22. What is the tendency to respond to a new stimulus as if it's the original conditioned stimulus?

- A. Stimulus discrimination C. Higher-order conditioning

- B. Stimulus generalization D. Spontaneous recovery

23. Our tendency to perceive things as complete objects rather than as a series of parts is known as the principle of

- A. closure B. good continuation C. proximity D. similarity

24. Which of the following might serve as a secondary reinforcer?

- A. sex B. grades C. food D. a pain-relieving drug

25. A student sometimes got A's on his midterm exams last year when he used his black pen to write the exams. Now he always takes his lucky black pen to exams. How did the student's superstitious behavior arise?

- A. Observational learning B. Classical conditioning C. Operant conditioning D. None of the above

26. Which of the following is a gestalt principle?

- A. intensity B. density C. proximity D. frequency

27. Which of the following is not a mental process?

- A. Feeling B. Walking C. Thinking D. Remembering

28. Classical conditioning usually works best if which of the following occurs?

- A. The conditioned stimulus (CS) is presented just after the unconditioned stimulus (UCS)

- B. The CS is presented just before the UCS

- C. The CS is presented many hours after the UCS

- D. All of the above are equally effective

29. Psychoanalysis emphasizes

- A. responses to stimuli B. unconscious motives C. conditioning D. conscious motives

30. One of the following early psychologists would have been most likely to agree with the statement, "The study of the mind should focus on how it allows us to adapt to our surroundings."

- A. Wilhelm Wundt B. William James C. John Watson D. Sigmund Freud

Write True if the statement is correct or False if it is Wrong on the space provided

- True 1. Counseling psychology basically intends to achieve the goal of psychology that aims to control behavior.
False 2. Behavior includes anything a person does that can be observed in some way.
True 3. Both positive and negative punishments discourage behavior.
True 4. The natural stimulus in Pavlovian classical conditioning is unconditioned stimulus.
False 5. Classical conditioning focuses on the learning of voluntary behavior.

II. Match the following psychological perspectives given under Column B with their descriptions given under column A

- | A | B |
|--|-----------------------|
| <u>E</u> 6. Believes that the whole is greater than the sum of its parts | A. Psychoanalysis |
| <u>D</u> 7. Emphasize the practical nature of the mind and survival adaptation | B. Structuralism |
| <u>F</u> 8. Emphasize the importance of learning in understanding how behaviors occur | C. Humanistic |
| <u>B</u> 9. Attempt to reduce conscious experience to its basic elements | D. Functionalism |
| <u>A</u> 10. Emphasize the unconscious mind and sexual urges in influencing human behavior | E. Gestalt psychology |
| | F. Behaviorism |

Choose the correct answer and write your letter of choice on the space provided

- D 11. Wilhelm Wundt is considered to be the "Father of Psychology" because:
A. first emphasized the unconscious causes of behavior
B. emphasized the importance of observable behavior.
C. first questioned how the mind worked
D. established the first scientific psychology laboratory.

- C 12. The smallest change in sensation that a person is able to detect 50% of the time is:
A. the absolute threshold
B. Weber's threshold
C. the just noticeable difference (JND).
D. sensory threshold

- A 13. It is common knowledge that the more you study, the higher your grade will be. What kind of correlation is this relationship?
A. Positive
B. Negative
C. Zero
D. Causal

- B 14. Sensation is to _____ as perception is to _____.
A. vision, olfaction
B. awareness, interpretation
C. conscious, unconscious
D. taste, vision

- B 15. A student does a good job on math problems for homework, and the teacher awards a sticker. This demonstrates the use of _____.

- A. extinction
B. reinforcement
C. spontaneous recovery
D. antecedents

- B 16. I have just walked into a very smelly house. After a while, I do not notice the smell as bad or at
